## Tools

Package Handler

SIARD Suite

## Tools

The Swiss Federal Archives offer tools and aids to assist you with digital archiving.

### Creating, examining and validating digital packages: Package Handler

At the Swiss Federal Archives (SFA), digital documents are archived as information packages. With the Package Handler, the tool developed by the SFA, these digital packages can be viewed, created, edited and validated.

### Archiving of Databases: SIARD Suite

Information about how the SIARD Suite digital database archiving software works and how to order it.

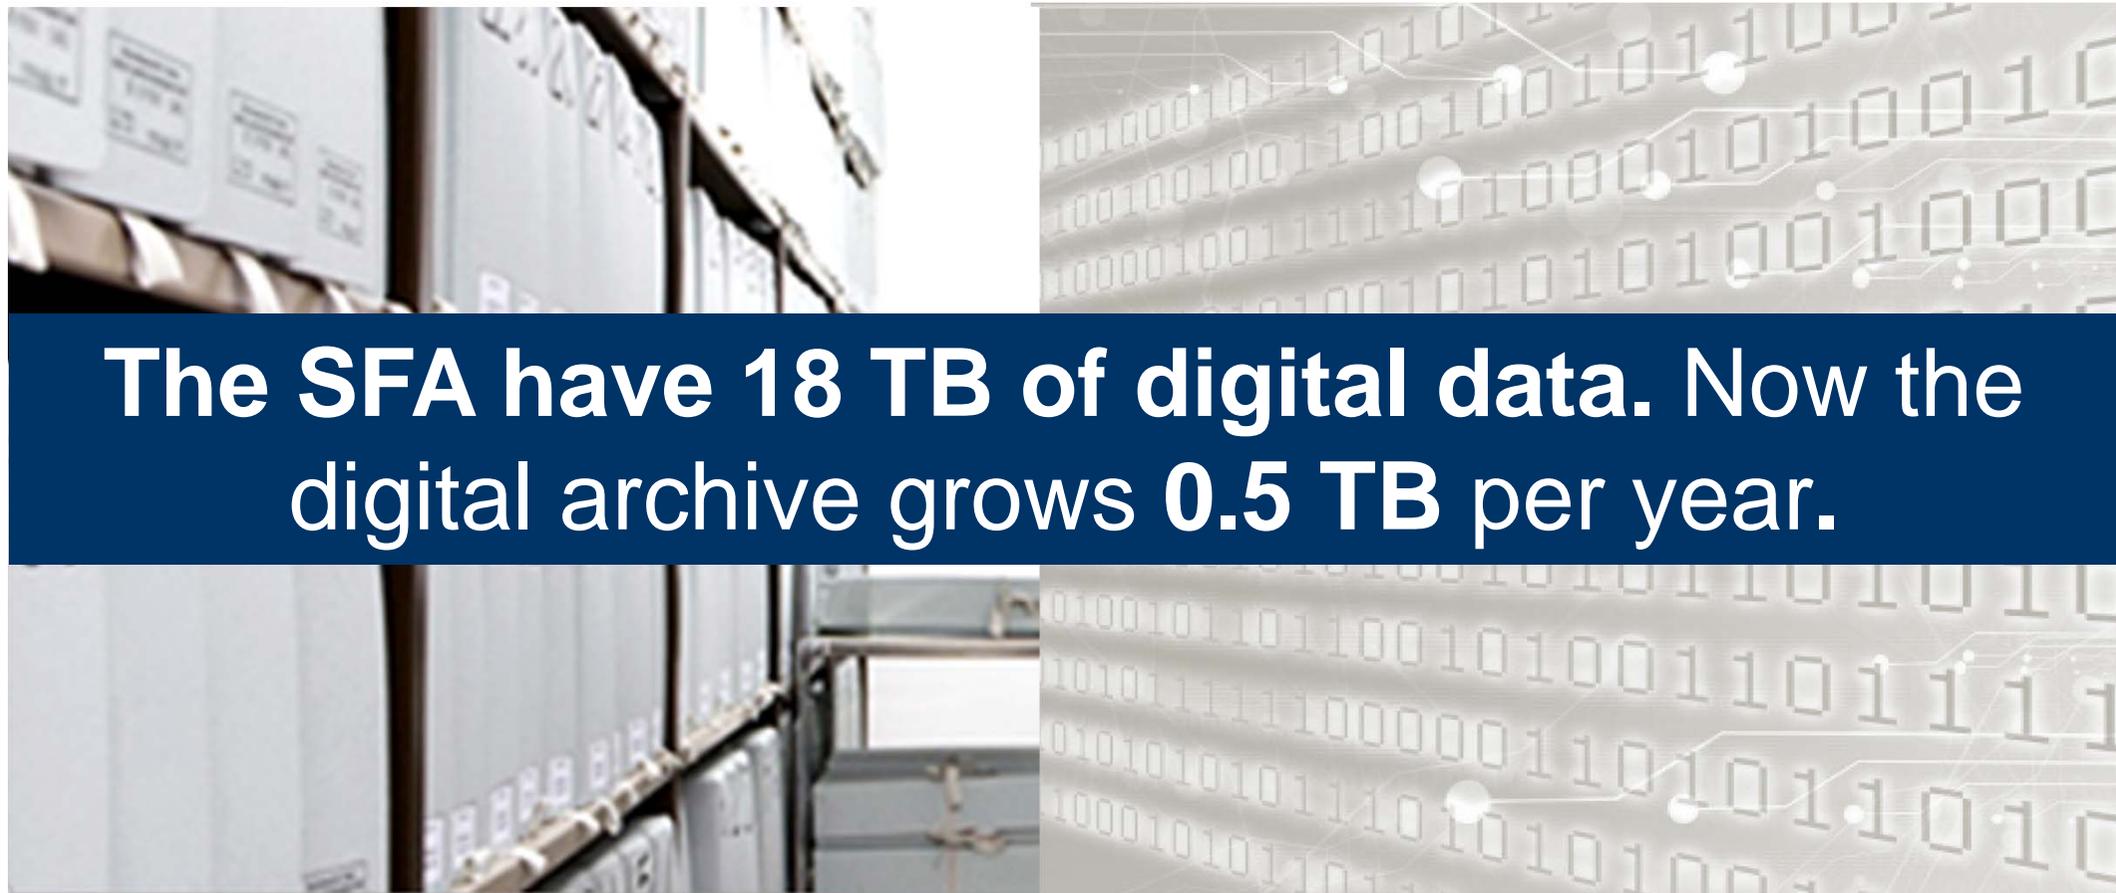

Last modification 30.11.2015

# Digital Archiving at the SFA

**The SFA have 18 TB of digital data. Now the digital archive grows 0.5 TB per year.**

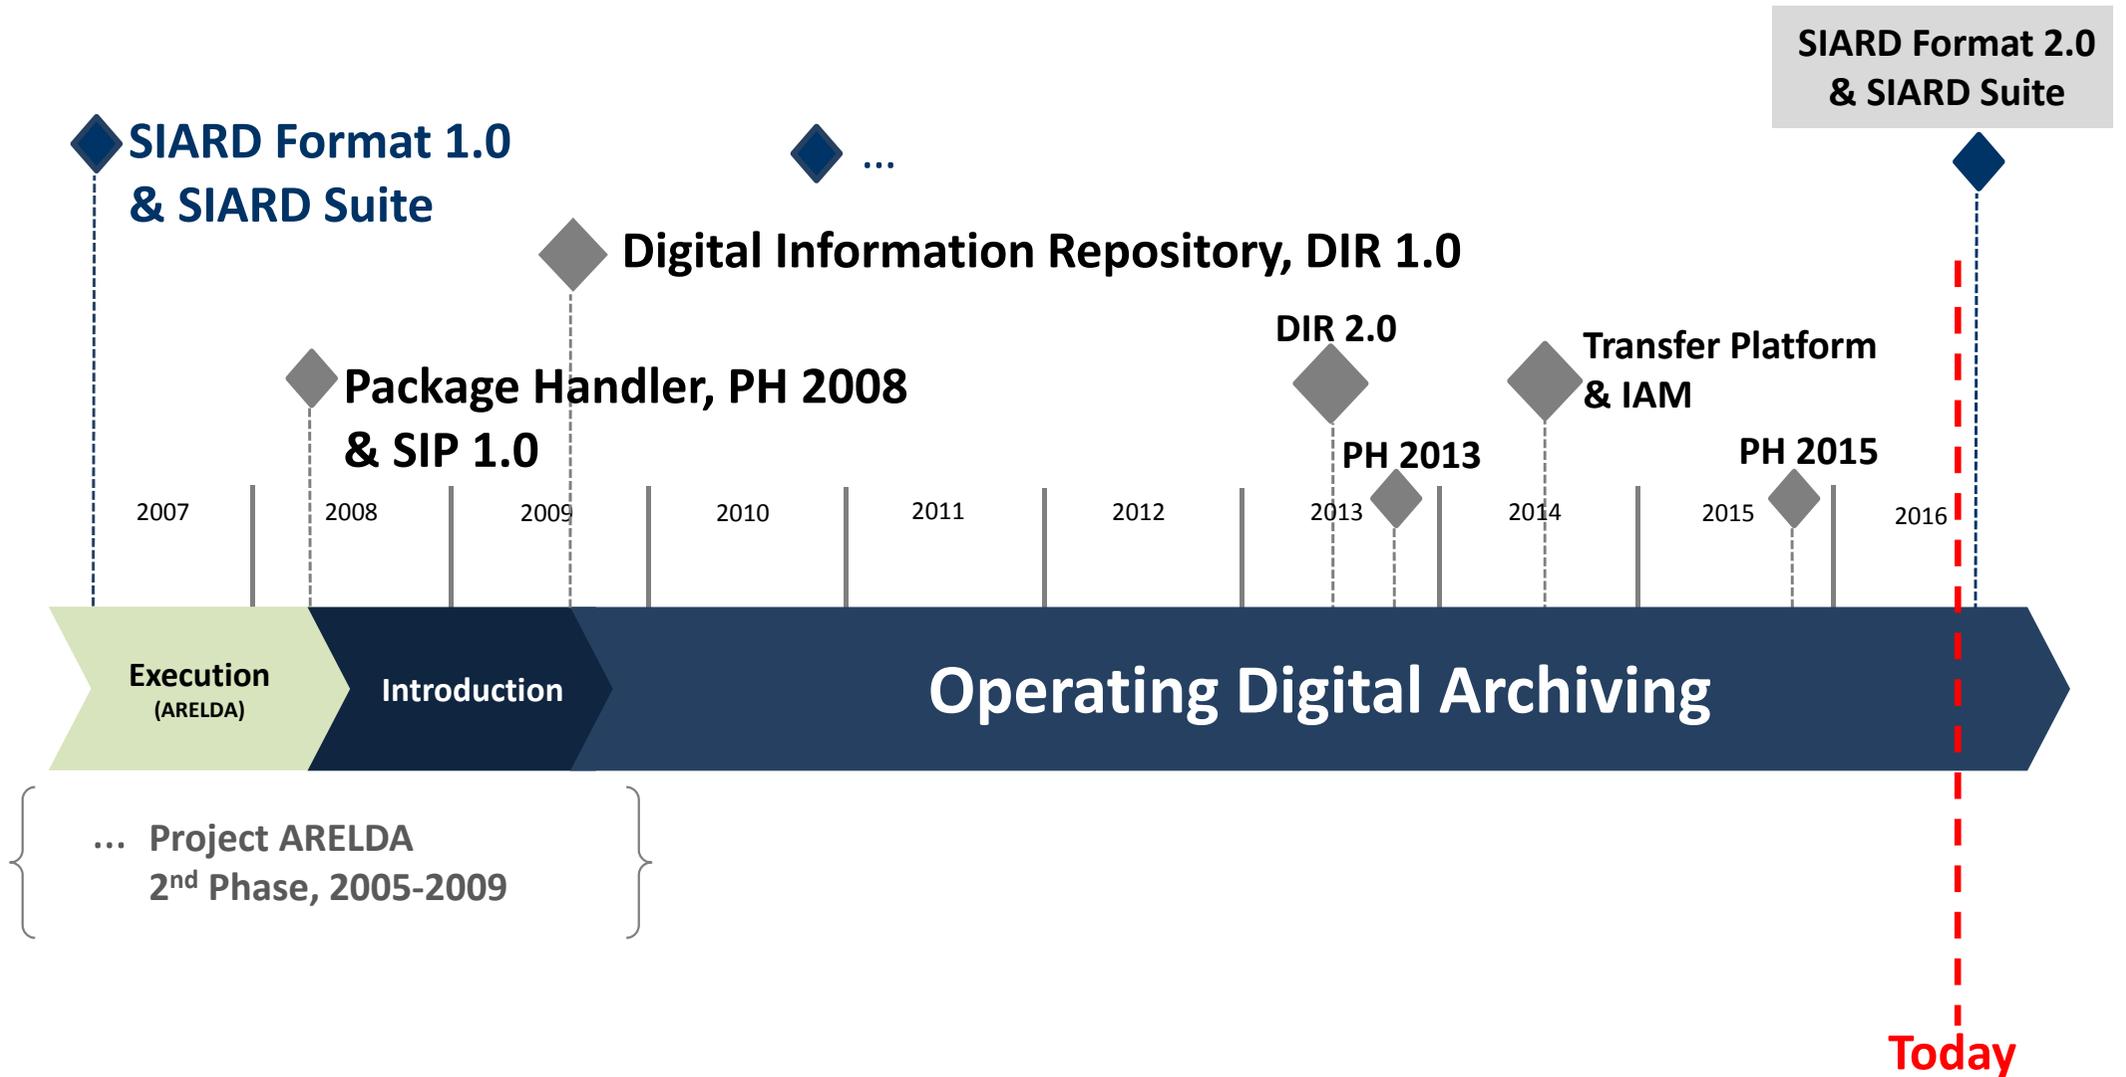

# Digital Archiving at the SFA

**Since 2009, the SFA have standardised processes and interfaces for digital archiving!**

# Digital Archiving at the SFA

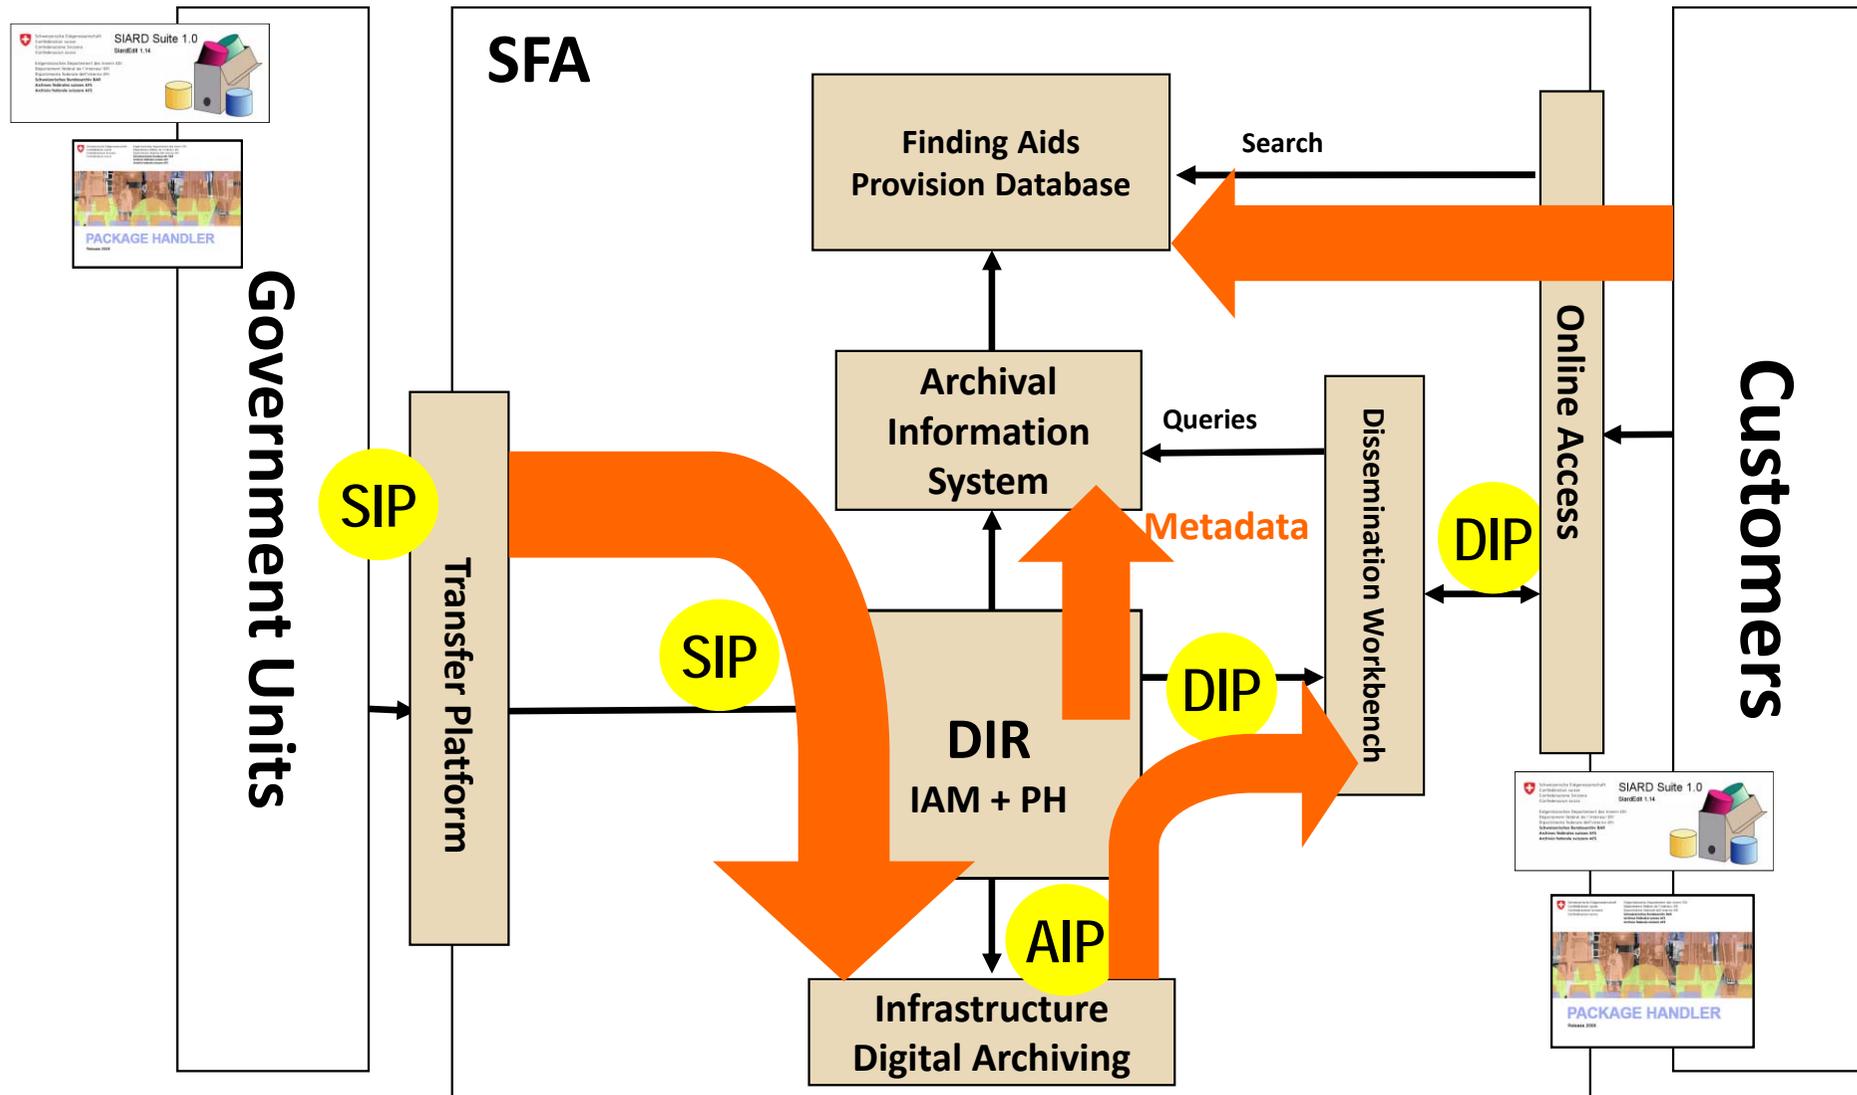

# Digital Archiving Principles at the SFA

- Application of a **standardised Archiving Process**
- **Migration strategy:**
  - **Decoupling** data from specific IT-Systems (Applications, Database- and Operating- Systems, Hardware)
  - Use of the **archivable file formats** – Reduction of number of file formats
- **Use of** international / national standards: **Standards** guarantee Stability, Sustainability and Continuity

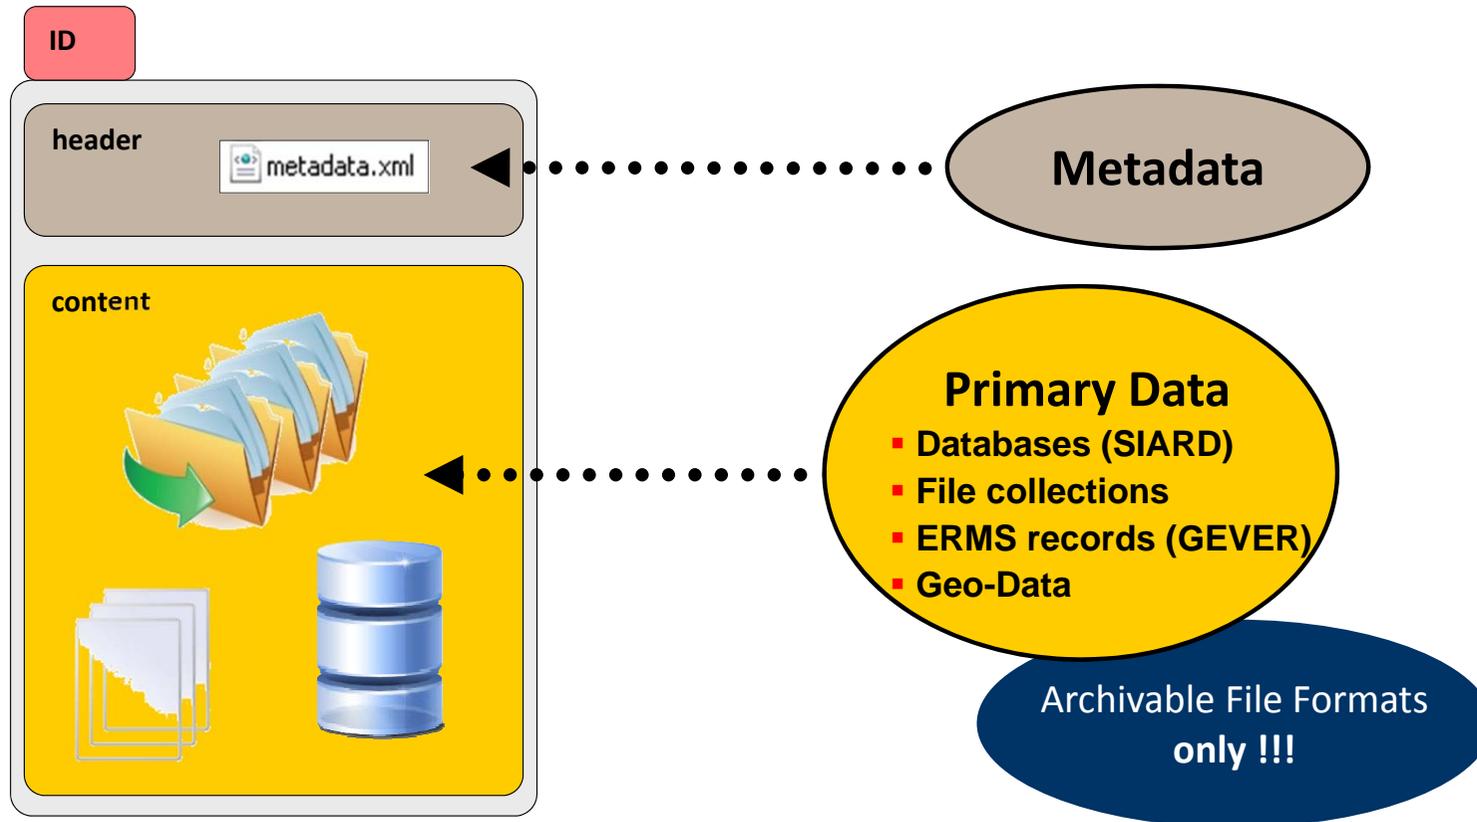

# Digital Archiving at the SFA

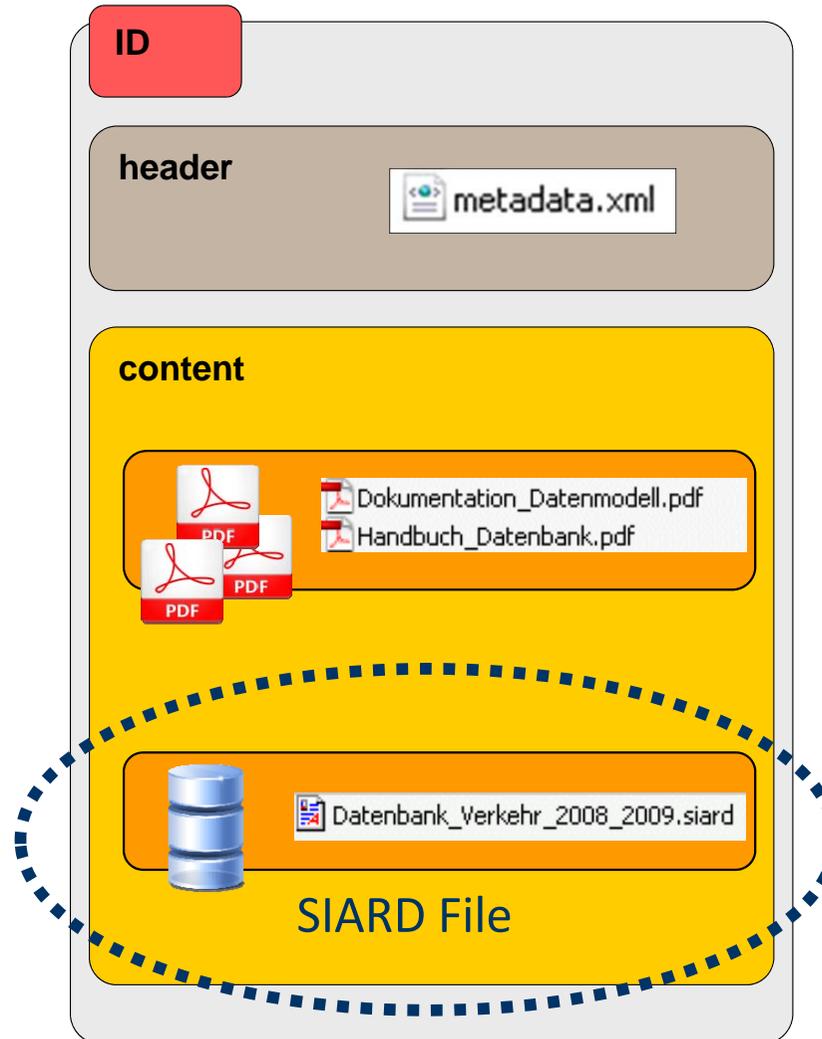

# Submission Information Package, SIP

# SIP and SIARD File

# Archivable File Formats

Scope	Archivable Formats	Remarks
Text (unstructured)	“plain text”	UTF-8, UTF-16 ISO-8859-1, ISO-8859-15 US-ASCII
“Office” documents	PDF/A-1	PDF1.4 with restrictions
Tables	CSV	Comma separated values
Relational databases	<b>SIARD</b>	
Raster images	TIFF	
Audio	WAVE	LPCM Codec
Video	MPEG-4	ITU H.264 / AAC
...		

# SIARD Format and SIARD Suite – The SFA's twofold Solution for Archiving Relational Databases

## Software Independent Archiving of Relational Databases

- Nature of data: databases
- Type: relational databases
- Convert content into archivable format
- Detachment of data from concrete applications

# Proprietary database management systems cannot be preserved for the long term

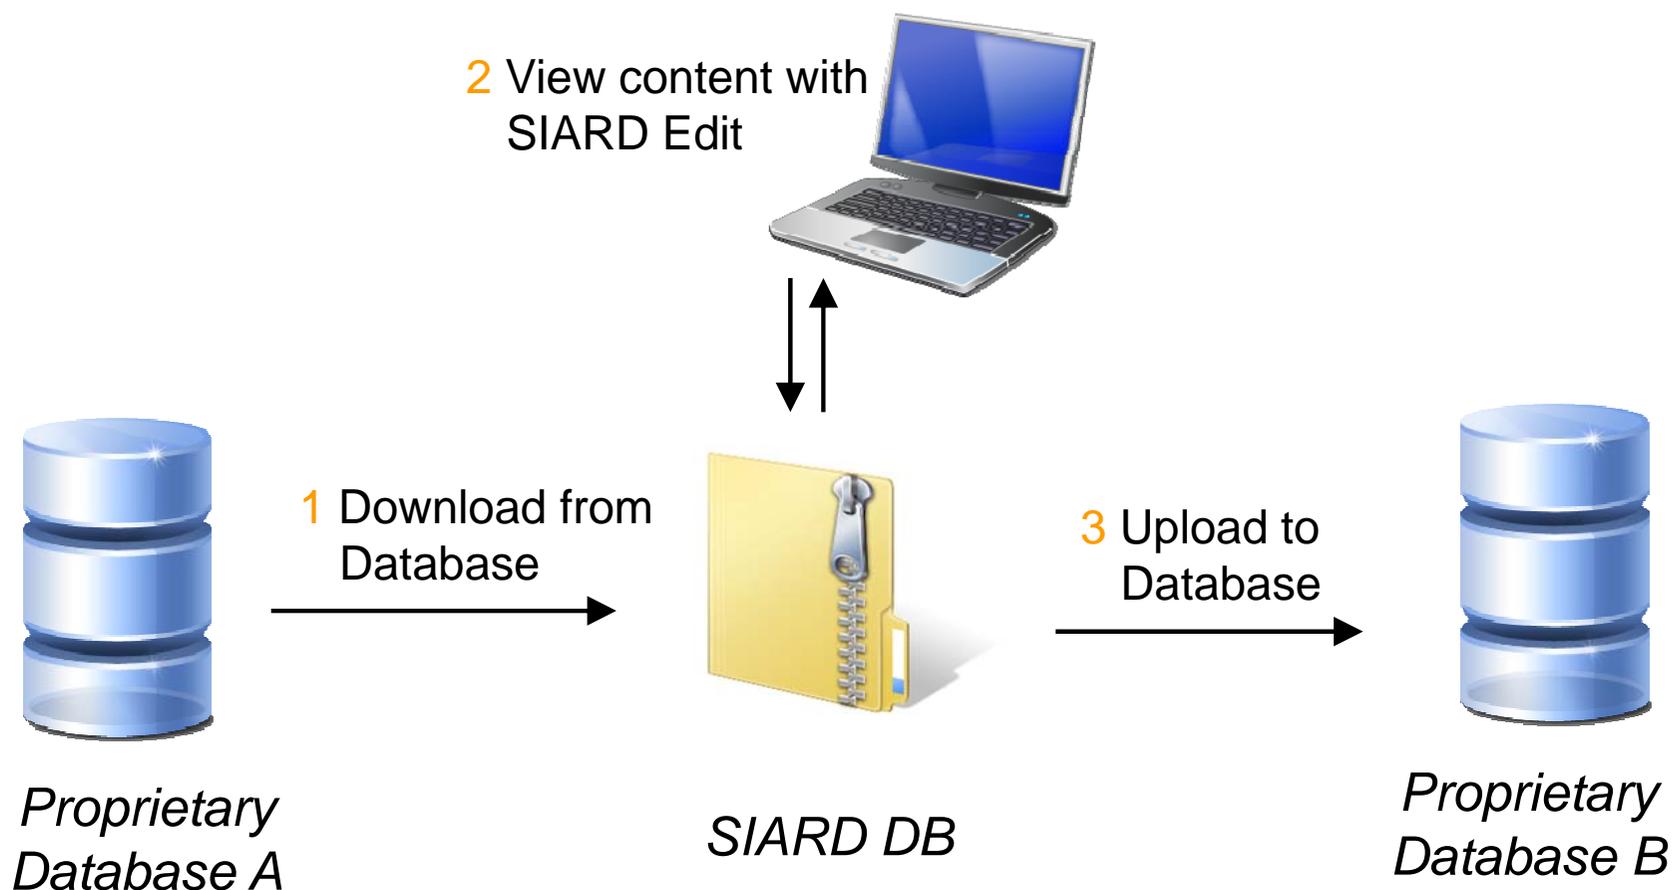

# The SFA developed the format **SIARD** for archiving the contents of relational databases

# SIARD Suite – Features

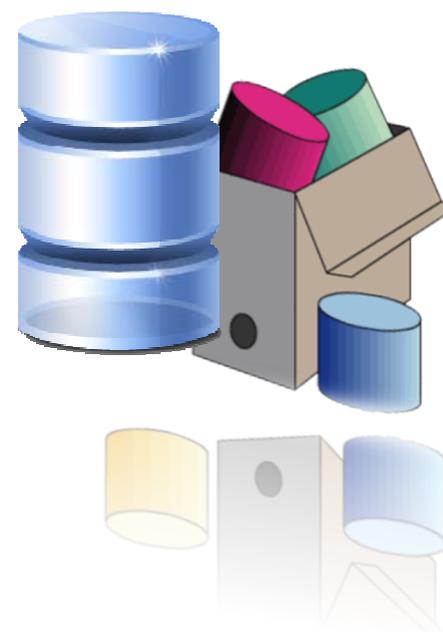

# SIARD Suite – Supported DBs

- (Excel)
- **Microsoft Access**
- **Oracle**
- **Microsoft SQL Server**
- **MySQL**
- **IBM DB2**
- Sybase
- Postgresql
- SQLite

SIARD Suite

SIARD download:

<https://www.bar.admin.ch/bar/en/home/archiving/tools/siard-suite.html>

# SIARD Format and SIARD Suite – Objectives

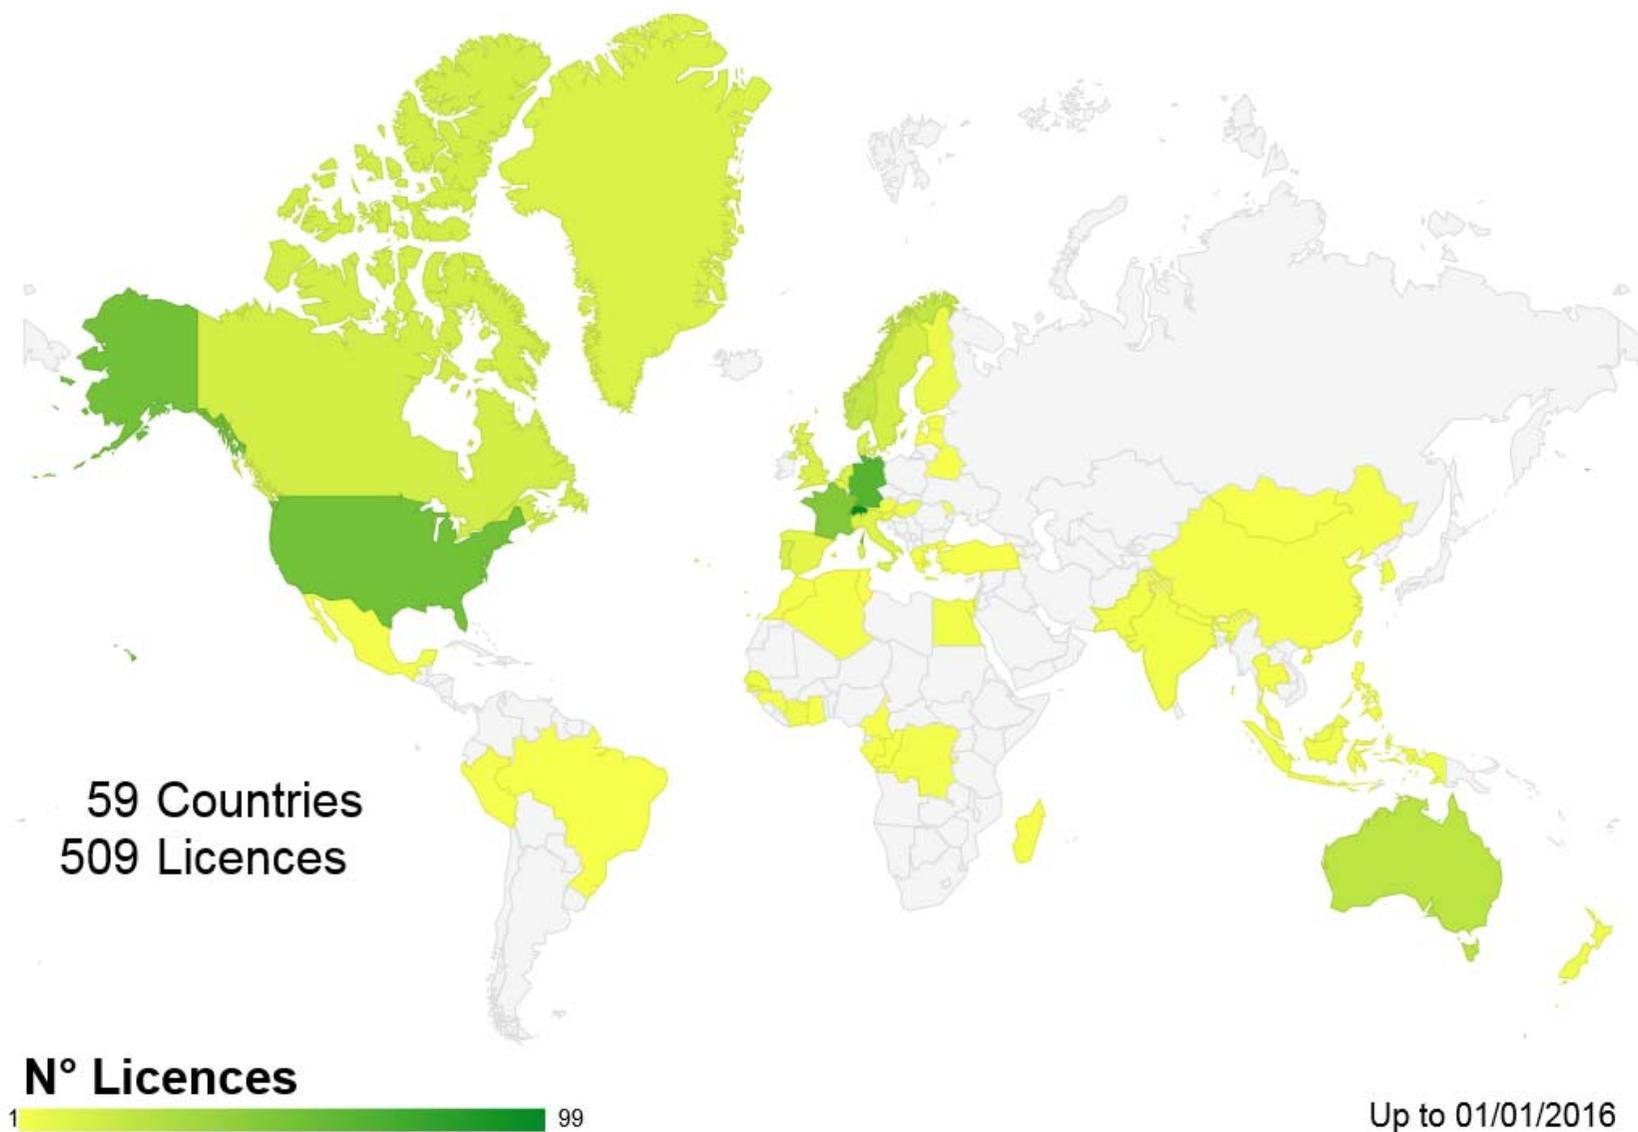

Long term  
preservation  
of the  
**CONTENT**  
of relational  
databases

Ensures  
**UNDERSTAND-  
ABILITY**

As well as  
**INDEPENDENCY**  
from a specific  
product

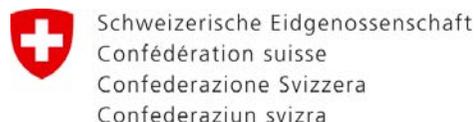

# SIARD Suite Usage Distribution Map

# From SIARD Format Version 1 to Version 2

**Swiss Federal Archives SFA**

**eCH-0165**

SIARD specification as a  
Swiss national standard, 2013

**SIARD Format 2.0**

- SIARD specification as a  
E-ARK standard
- eCH-0165, 2016

# Archiving Process of DBs – Overview

# Archiving Process – Advice

- Often federal offices are not familiar with database preservation and need advice on how to archive them
- SFA provides individualized workshops regarding the agencies' needs
- Discussion of relevance of primary data, taking into account the technical and legal framework

# Archiving Process – Advice

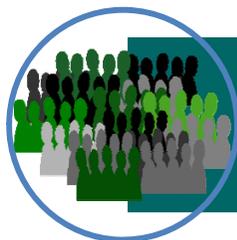

**Ensure the understandability of the DB content for the future!**

- System Specification
- Description of performed Schema-Migrations (if any)
- Entity-Relationship-Diagrams
- Data descriptions, Code-lists
- Screenshots, User Documentation and so on.

# Archiving Process – Appraisal

The same procedure as for the appraisal of any other data!

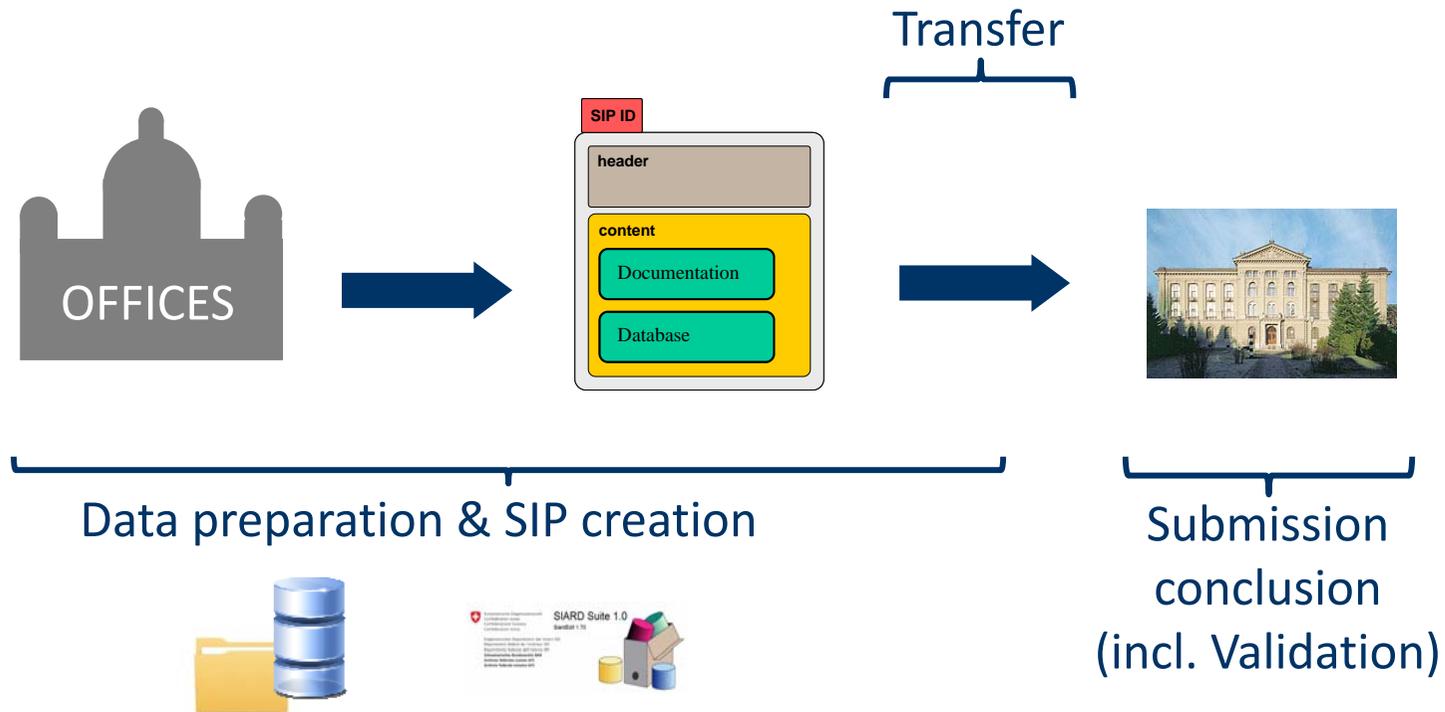

Considering the needs of users of DBs in appraisal process

Context documentation is always important!

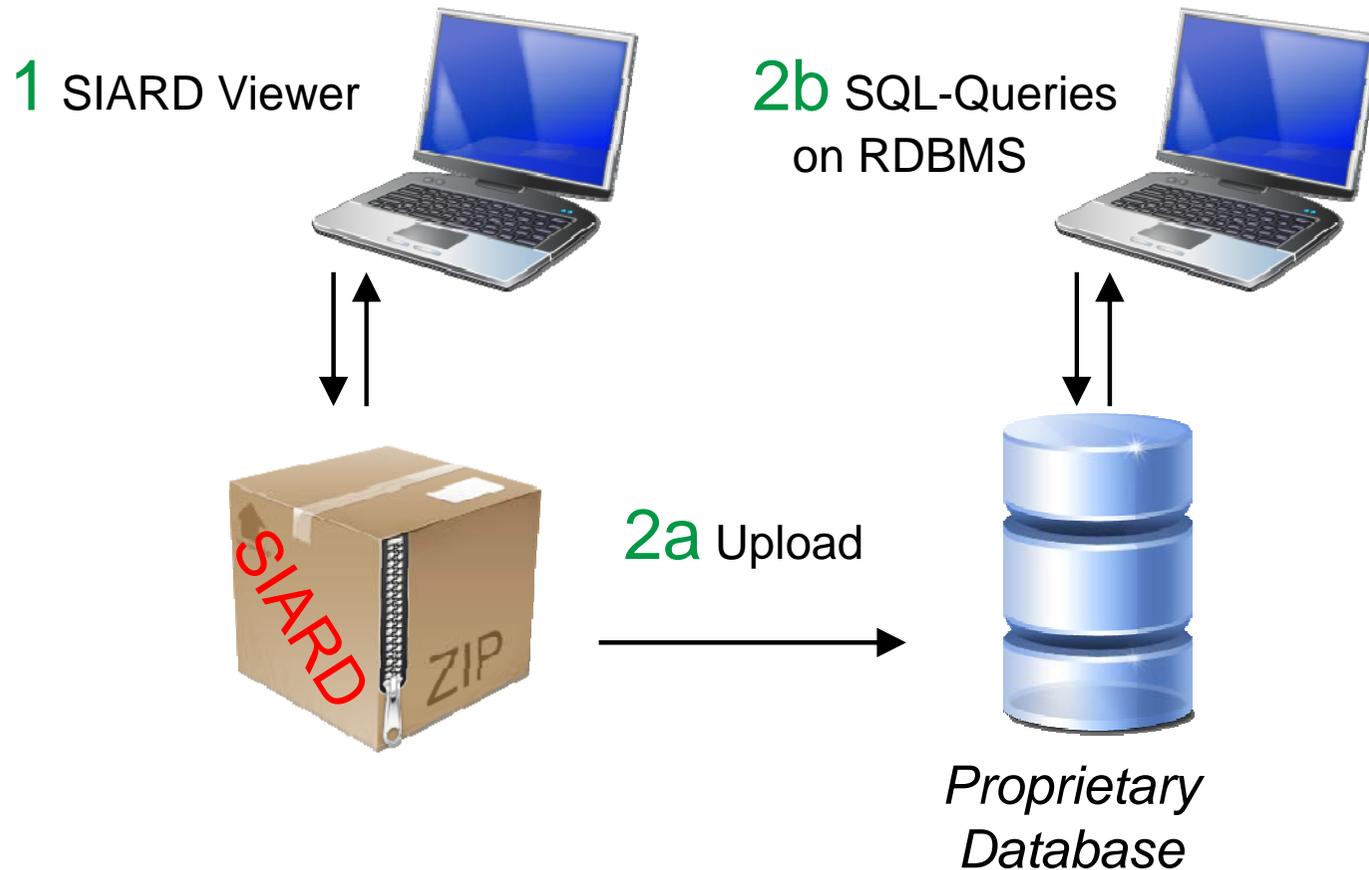

# Archiving Process – Acquisition

- Federal Offices must transfer their data as a SIP (OAIS)
- SFA validates all incoming SIP

# Archiving Process – Access to SIARD databases

# Archiving Process – Access

## *Customer access to SIARD databases*

- Different types of customers:
  - Offices
  - General public (researchers, press, individuals, ...)
  
- Two possibilities of access to information
  - «full access»:  
The SFA delivers a DIP (with SIARD file)
  - «partial access»:  
The SFA-staff searches RDB Management System where SIARD-file is loaded, and only answer question (only specific excerpts of the database are delivered to the customer)

# Different Applications make use of the SIARD Format

## Swiss applications

- **SIARD Suite** (incl. Edit/Viewer)
- KOST-Val
- SIARDexcerpt
- csv2siard

## E-ARK applications

- **DBPTK**
- db-visualization-toolkitcsv2siard

# SIARD Format and SIARD Solutions

*Collaboration is the cornerstone of our success!*

# Thank you – Merci!
